

# KNEE REVISION SYSTEM

As the number of worldwide knee revision surgeries increases, so does the need for an effective knee revision instrument system.

Our Knee Revision instruments are easily recognized and organized in trays. The system includes our popular cement removal tips and ergonomically designed silicone handles and instruments for implant removal.

The Knee Revision System features various cement removal instrument tips to accommodate all types of revision situations. The ergonomic silicone handles are comfortable and withstand repeated sterilization.

Contact your local Sales Manager or visit [tecomet.com](http://tecomet.com) for more information.
